# CRYPTO TRADING FUND

The **Crypto Trading Fund (CTF)** is a **global trading fund** that requires international-based currencies. **WE** use **BTC, ETH** and **USDT**.

**WE** permit **investor's** to deposit **BTC, ETH** and **USDT** into their **account** on well-known **exchanges** like **BitMEX, ByBit, Binance Futures** and provide **US** with their **API** without **Withdrawal Permission** from which our **trader's** use to **trade** on the **cryptocurrency market** which is similar to the **foreign exchange market**.

Our principal **trading** pairs are **BTC/USDT** and **ETH/USDT**, all **buying** and **selling** occur at our **trading desk** intending to return a **profit** for all **investors**. Many **Crypto investor's** and **trader's** lack the **essential sources** to habits applicable lookup on the **burgeoning digital assets**.

**Our trading fund** was developed to **remedy** this very **problem**; honestly **trust** our **trading fund** with your **BTC, ETH** and **USDT holdings** and **WE** will professionally **invest** and **exchange** your **capital** among **several assets**.

The **trading fund** is constantly **managed** and new **coins** are continuously being **researched** to supply **buyers** with the **best** viable **returns** on their **capital**. Our **Fund** favours **blockchain** initiatives and there are nonetheless masses of activity in the complete disruption of the ancient **financial** system.

**OUR MINIMUM CAPITAL RETURNS PER YEAR is 40%**

PROPOSAL**

# CRYPTO TRADING FUND

**WE** trade **investor's** funds through several **positions**, in both **long** and **short** strategies. **Trading desk**, the place where **WE** make **trades** in a variety of **BTC** to **Fiat**, and **ETH** to **Fiat** pairings. These **pairings** have been **chosen** for their **projected returns**, from those digital properties which show each traditionally **excessive** overall **performance** and **robust** workable future **gains**. Likewise, our **analysts/traders** have **chosen** these **pairs** with a **low-risk** profile to **maximize returns**.

**WE** don't **accept** or **store** your **funds** on our **accounts**. Our **trader's** **work** with **your** account **API's** all the time.

**Our** trading **strategy** is based on our **analysis** which is based on proven **algorithms** that work on **minimizing risks** and **aims** for **long term profitability**, by taking the **best** opportunities, and **automatically** locking **profits**.

The **investors** only have to **register** on exchanges like **BitMEX (BTC)**, **ByBit (ETH)**, **Binance Futures (USDT)** using our **affiliate** link and provide **US** with their **API** without the **Withdrawal** function. From then on, as **soon** as our **traders** identify a **profitable** opportunity; orders will be **automatically** executed on the **investor's** account. **WE** only require **trading** access; **WE** will never **request** withdrawal permissions to your trading **account**. **WE** recommend **you** don't **create** new or modify existing **orders** in your **Exchange** account that is **provided** to **US**.

# CRYPTO TRADING FUND

**WE** charge **5%** of your **Invested Capital** as a **security** fee **beforehand**. This **Fee** is to make sure **WE** are **able** to **Grow** Your **Portfolio** for a **Long** Term and **You** don't **Run** Away with Our **Commission**. Our **trading fund** is purely **focused** on making **profits** from your **Crypto** Holdings, only then **WE** make **profits** for **US**. This makes **US** financially **incentivized** to supply **returns** on your **capital**.

**WE** don't have a **Minimum** Trading **Capital** for you to **Invest** but **WE** have **2** different **Trading** Plans depending on your **Capital**. There's the **Long** Term **Trading** Plan for **Investor's** Capital below **0.1 BTC** where **trades** can take **days-months** to end. Our **Goal** in this **plan** is to **Increase** your **BTC** up to **0.11 BTC** so **WE** can **upgrade** you to the **Next** Plan.

The **Next** Plan is our **Short** Term **Trading** Plan for **Investor's** Capital above **0.11 BTC** or **equivalent**. **Intraday** Trades so you get to **see** your Portfolio **Grow** Daily.

## P&L CALCULATIONS

**Long Term** Plan **Commissions** are **30%** to **US**, **70%** to **you** and **only BTC** on **BitMEX** is **accepted**.

**Short Term** Plan **Commissions** are **50% each**. **BTC** on **BitMEX**, **ETH** on **ByBit** and **USDT** on **Binance Futures** is **accepted**.

**COMMISSIONS TO BE PAID MONTHLY**

# DISCLAIMER

**WE** are right here to make **investments** and alternate **digital property** on your **behalf** because when you **profit**, **WE** profit with **you**. You have to be **conscious** of the **dangers** and take **delivery** of these **dangers**. Furthermore, **WE** operate on the most **secure** cryptocurrency **exchanges** in the **world** using your **API**.

Finally, **WE** are a **trading fund** that sees daily **adjustments** in both **directions**. This capacity that your **Portfolio** may also **develop** on some days and **decline** on others. This is **fundamental** to **understand** earlier than **getting** into the **trading fund** as **losses** do appear even although **WE** have been **profitable** since the **beginning** of our **trading fund**.
